Wed, 05 Dec 2018 01:29:00 GMT www.mechanical-engineering-books-pdf.blogspot.com - In thermodynamics, an isentropic process is an idealized thermodynamic process that is both adiabatic and reversible. The work transfers of the system are frictionless, and there is no transfer of heat or matter. Such an idealized process is useful in engineering as a model of and basis of comparison for real processes. The word
